

EDITORIAL

Dear readers,

It is with great enthusiasm that we present the second edition of the Margarida Penteado Journal of Geomorphology, a space dedicated to sharing knowledge and discoveries in the fascinating field of geomorphology. In this issue, we are pleased to bring a rich selection of content that promises to spark your interest and expand your understanding of the geomorphological dynamics of our planet.

We begin by highlighting the events of 2024 that marked the geomorphological calendar, featuring experts who shared their studies and experiences. These exchanges are essential for the evolution of our discipline and encourage collaboration among researchers and students.

In the article section, we present innovative investigations addressing topics from landscape evolution to the impacts of climate change on landforms. Readers will also find detailed maps illustrating various scales of geomorphological analysis, offering a new perspective on the presented data.

Furthermore, the journal features interesting releases, including books, theses, and dissertations that enhance knowledge and discussion in geomorphology. We encourage everyone to explore these works, which will surely contribute to enriching your library.

In this edition, we also had the pleasure of including a commented classic, shedding light on a fundamental work of geomorphology, providing a critical and updated view of its contributions to the field. This reflection is vital for understanding the evolution of our knowledge and the paths it may take.

We must also mention the geomorphological photographs that adorn our pages. They not only capture the beauty of our landscapes but also serve as a valuable educational resource, visually illustrating geomorphological phenomena in an impactful way.

We are committed to making the Margarida Penteado Journal of Geomorphology an indispensable vehicle for all who love and study the earth sciences. We hope you enjoy this edition, which was created with dedication and love for geomorphology. Stay curious, explore the pages, and contribute your own research and reflections in upcoming editions.
